

Articraft-10K

A large collection of 3D models of various objects, including a satellite dish, a large cylindrical structure, a crane, a boat, a car, a chair, a table, and many smaller mechanical and industrial components, arranged on a white background. The models are rendered in a clean, stylized manner with a limited color palette of grays, blues, and greens. The objects are scattered across the frame, with some larger structures like the satellite dish and the crane in the background, and smaller items like chairs and tables in the foreground. The overall composition suggests a comprehensive library of 3D assets for various applications.
