

Approaching

The robot's gripper is open and **moving toward** the orange-juice, which sits on the floor near the center of the scene. The basket is to the left, empty and ready. The gripper is **approaching** the orange-juice, **preparing to close** around it. Next, it will grasp the bottle and lift it.

Transporting

The robot's gripper is closed, **securely holding** the black-bowl. The bowl is in-gripper, positioned above the plate on the table. The arm is **actively moving, transporting the bowl toward the plate**. Next, it will release the bowl onto the plate.

Placing

The gripper is open and **positioned above the basket**, which now contains the chocolate-pudding. The object rests securely inside, **having just been released**. The robot's arm is nearly still, with the gripper slightly raised from the basket. This moment is **placing**.
